

VEERAPUTHIRAN S

Senior Backend & AI Engineer

+91 80723 75945 • veera.sputhiran@gmail.com • [Linkedin](#) • [Portfolio](#) • Chennai, India

Summary

Senior Backend & AI Engineer with 9+ years of experience building enterprise SaaS, backend platforms, distributed systems, finance/ERP products and applied AI solutions.Strong hands-on experience in Java, Spring Boot, Python, FastAPI, REST APIs, PostgreSQL, MySQL, Kafka, Redis and event-driven architectures, with cloud and infrastructure experience across AWS, GCP, Docker and Terraform.Experienced in scalable backend architecture, API security, asynchronous workflows, relational data modeling, performance optimization, LLM/RAG systems and production support. Collaborated with global and cross-functional stakeholders across product, finance, client teams, engineering and leadership, translating business requirements into technical designs and supporting delivery through UAT, release readiness and production.

Skills

Programming & Backend: Java • Spring Boot • Python • FastAPI • Node.js • REST APIs • Microservices • Spring Security

Frontend:

React.js • Next.js • Angular • TypeScript • Redux • Material UI • REST API Integration • Component-Based Architecture • Role-Based UI Workflows

AI / Generative AI:

LLMs • Retrieval-Augmented Generation (RAG) • Prompt Engineering • Semantic Search • Vector Retrieval • Document Intelligence •

AI Workflow Orchestration • ML/NLP • AI-Assisted Enterprise Applications

Databases & Messaging:

PostgreSQL • MySQL • MongoDB • Redis • Kafka • SQL • NoSQL • Data Modeling • Query Optimization • Indexing • Event-Driven Architecture

Cloud & DevOps: AWS • Microsoft Azure • GCP • Docker • Terraform • CI/CD • Azure DevOps • Git • CloudWatch

Security & Engineering:

JWT • RBAC • Authentication • Authorization • API Security • Validation • Logging • Error Handling • JUnit • Mockito • SonarQube • Postman •

Prometheus • Grafana • JUnit • Mockito • pytest • SonarQube • Postman • Stakeholder Collaboration • Technical Documentation • Mentoring

Experience

Tickmarks

Chennai, India

Senior AI Developer

02/2026 - 09/2026

Finance & ERP Product Engineering

- Built and integrated full-stack finance and ERP product features using Python, FastAPI, React.js, and MySQL, emphasizing REST APIs and scalable backend design.
- Developed LLM and RAG-based document intelligence workflows for ERP data processing and deterministic validation.
- Created React.js UI modules linked with FastAPI backend for robust role-based enterprise applications.
- Implemented ERP sync and ontology-mapping for various organizational entities, enhancing data accuracy and accessibility.
- Designed collection workflow APIs for financial operations such as receivables management and dispute resolution.
- Established document comparison, anomaly detection, and risk-enrichment services to improve auditable finance workflows.
- Collaborated with global stakeholders across product, finance, engineering and leadership to translate business requirements into API design, workflow implementation, integration validation, UAT, release readiness and production support.

Concentrix - Client: Fluence Energy

Senior Software Engineer

10/2025 - 02/2026

Enterprise Energy Platform | Client-Facing Backend Delivery

- Developed enterprise backend services using Java, Spring Boot, REST APIs and PostgreSQL
- Designed and maintained scalable microservice APIs supporting customer-facing and internal enterprise workflows
- Implemented JWT authentication, Spring Security and RBAC for secure, role-aware application access
- Optimized PostgreSQL queries, database views and backend data-access logic to improve API performance and maintainability
- Worked on event-driven notification and email-processing workflows using GCP and Firestore
- Improved validation, logging, error handling and production diagnostics across backend services
- Collaborated directly with client and cross-functional stakeholders across requirements clarification, defect resolution, integration validation, release readiness, performance tuning and production support.

Experience

Layerpath

Senior Full-Stack / Backend Engineer

02/2025 - 09/2025

AI SaaS Product | Product Engineering

- Built scalable backend services for an AI SaaS platform using Java, Spring Boot, Python and REST APIs
- Developed APIs supporting asynchronous workflows, real-time data ingestion and concurrent application workloads
- Designed secure API contracts, authentication, authorization, validation and centralized error-handling mechanisms
- Collaborated across backend, frontend, product and QA teams to deliver end-to-end product capabilities
- Provisioned and maintained AWS infrastructure using Terraform, including API Gateway, Lambda, S3 and IAM, contributing to approximately 70% reduction in environment setup time
- Improved platform stability, scalability and operational reliability for customer-facing workloads while supporting deployment and production issue resolution

Zoho Corporation

Member Technical Staff (Software Developer)

05/2019 - 01/2025

Zoho Campaigns / Anti-Spam Engineering

- Developed large-scale product and backend capabilities using Java, Spring Boot, Node.js, Python, TypeScript, and REST APIs for Zoho Campaigns and Anti-Spam platforms.
- Built ML-assisted spam detection services, improving accuracy by ~40%, and designed reusable backend APIs for content analysis and email-processing workflows.
- Optimized Java, Python, and PostgreSQL services to reduce API response times by ~20%.
- Implemented Kafka-based asynchronous email-processing pipelines with Redis and MongoDB.
- Deployed and supported cloud-based services using AWS, Docker, Terraform, and CI/CD pipelines with secure authentication via Spring Security.
- Mentored junior engineers in code reviews, design discussions, and engineering best practices across Java, Python, React, and backend development.

Zoho Corporation

Chennai, India

Trainee - Software Engineering

04/2017 - 05/2019

- Contributed to backend services and UI modules using Java, SQL, REST APIs, React.js, and Python for Zoho Campaigns and Antispam product
- Built strong foundations in requirements analysis, implementation, testing, debugging, release processes, and production support.

Education

Zoho University

04/2016 - 04/2017

Software Engineering Program

- Intensive full-time software engineering training in programming, data structures, OOP, database design, Java/SQL application development, debugging, SDLC, version control and collaborative software delivery

Projects

AI Recruiter Copilot

- Python · FastAPI · TF-IDF · LLM · Docker
- Built an evidence-grounded recruiter assistant that retrieves relevant information from a public portfolio before generating answers
- Implemented TF-IDF lexical retrieval, context building, source attribution, strict no-evidence refusal, and an OpenAI-compatible LLM provider
- GitHub: [ai-recruiter-copilot](#)

Event-Driven Order Platform

- Java 21 · Spring Boot · Kafka · PostgreSQL · Redis
- Built distributed backend for order processing using outbox, Kafka choreography, idempotency, failure compensation, and consistency
- Designed reliable cross-service order, inventory, and payment workflows with explicit handling for retries and partial failures
- GitHub: [event-driven-order-platform](#)

AI Production Log Investigator

- Python · FastAPI · PostgreSQL · React · TypeScript
- Developed an incident investigation platform with log parsing, redaction, error fingerprinting, frequency, latency analysis, correlation tracing & incident grouping
- Optional LLM processing explains deterministic findings than generating the investigation itself
- GitHub: [ai-production-log-investigator](#)

Projects

API Contract Impact Analyzer

- Java 21 · Spring Boot · OpenAPI · React · TypeScript
- Built a deterministic OpenAPI compatibility analyzer that detects consumer-impacting API changes before release
- Implemented compatibility rules, schema analysis, security detection, stable findings, and CI support
- [GitHub: API-contract-impact-analyzer](#)
