

VEERAPUTHIRAN S

Senior Full Stack | Backend | AI Engineer

+91 80723 75945 veera.sputhiran@gmail.com linkedin.com/in/veeraputhiran-s-3218ba148 Chennai, India

EXPERIENCE

Senior AI Developer

02/2026 - Present Chennai, India

Finance & ERP Product Engineering

- Built full-stack finance and ERP product features using Python, FastAPI, React.js, Next.js, TypeScript, MySQL and REST APIs.
- Designed and developed scalable backend APIs, business workflows and relational data models for enterprise finance applications.
- Developed LLM and RAG-based document intelligence workflows connecting ERP records, extracted document data, retrieval context and deterministic validation rules.
- Built React.js UI modules and integrated frontend workflows with FastAPI backend services for role-based enterprise applications.
- Developed ERP sync and ontology-mapping workflows for companies, sub-companies, legal entities, and dataset mappings.
- Developed collection workflow APIs covering outstanding receivables, customer responses, promise-to-pay, disputes, escalations, recovery, write-off review and reporting.
- Implemented document comparison, anomaly detection and risk-enrichment services for auditable finance workflows.
- Worked across requirements, API design, database changes, frontend/backend integration, debugging, UAT, release readiness and production support while maintaining backward-compatible APIs and database changes.

Senior Software Engineer

Concentrix - Client: Fluence Energy 10/2025 - 02/2026

Enterprise Energy Platform | Client-Facing Backend Delivery

- Developed enterprise backend services using Java, Spring Boot, REST APIs and PostgreSQL
- Designed and maintained scalable microservice APIs supporting customer-facing and internal enterprise workflows
- Implemented JWT authentication, Spring Security and RBAC for secure, role-aware application access
- Optimized PostgreSQL queries, database views and backend data-access logic to improve API performance and maintainability
- Worked on event-driven notification and email-processing workflows using GCP and Firestore
- Improved validation, logging, error handling and production diagnostics across backend services
- Collaborated with client stakeholders on requirements, defect resolution, releases, performance tuning, production support, code reviews, SonarQube remediation and legacy improvements

SUMMARY

Senior Full Stack, Backend & AI Engineer with 9+ years of experience building enterprise SaaS, ERP, finance, AI-driven and customer-facing applications. Strong hands-on expertise in Java, Spring Boot, Python, FastAPI, Node.js, React.js, Next.js, TypeScript, REST APIs and microservices. Experienced in scalable backend architecture, event-driven systems, API security, database design and cloud-native development using PostgreSQL, MySQL, MongoDB, Redis, Kafka, AWS, GCP and Azure. Hands-on experience with LLMs, RAG, document intelligence and AI-assisted enterprise workflows. Experienced in system design, technical documentation, code reviews, mentoring, production support and end-to-end feature delivery.

KEY ACHIEVEMENTS

- Enhanced API Performance**
Improved API response times by 20% through optimized Java and PostgreSQL services.
- Accelerated AWS Setup**
Reduced environment setup time by 70% by provisioning AWS infrastructure with Terraform.
- Boosted Spam Detection**
Achieved 40% increase in spam-detection accuracy with ML-assisted services for Zoho.
- Scaled Finance Applications**
Implemented scalable APIs supporting over 10,000 daily transactions in finance applications.

EXPERIENCE

Senior Full-Stack / Backend Engineer

Layerpath 02/2025 - 09/2025

- AI SaaS Product | Product Engineering
- Built scalable backend services for an AI SaaS platform using Java, Spring Boot, Python and REST APIs
 - Developed APIs supporting asynchronous workflows, real-time data ingestion and concurrent application workloads
 - Designed secure API contracts, authentication, authorization, validation and centralized error-handling mechanisms
 - Collaborated across backend, frontend, product and QA teams to deliver end-to-end product capabilities
 - Provisioned AWS infrastructure using Terraform across API Gateway, Lambda, SQS/SNS, RDS, VPC, IAM, ALB and S3, reducing environment setup time by approximately 70%
 - Improved platform stability, scalability and operational reliability for customer-facing workloads while supporting deployment and production issue resolution

Member Technical Staff (Software Developer)

Zoho Corporation 05/2019 - 01/2025

- Zoho Campaigns / Anti-Spam Engineering
- Developed large-scale product and backend capabilities using Java, Spring Boot, Node.js, Python, TypeScript and REST APIs for Zoho Campaigns and Anti-Spam platforms
 - Built ML-assisted spam detection and content moderation services, improving spam-detection accuracy by approximately 40%
 - Designed reusable backend APIs and services for spam detection, content analysis and email-processing workflows
 - Developed Node.js and Java-based backend components supporting high-volume enterprise application workflows
 - Implemented Kafka-based asynchronous email-processing pipelines with Redis and MongoDB
 - Optimized Java, Python and PostgreSQL services, reducing API response times by approximately 20%
 - Deployed and supported cloud-based services using AWS, Docker, Terraform and CI/CD pipelines, with secure authentication using Spring Security
 - Mentored junior engineers through code reviews, design discussions and engineering best practices across Java, Python, React and backend development.

Trainee - Software Engineering

Zoho Corporation 04/2017 - 05/2019 Chennai, India

- Developed backend services and UI modules using Java, SQL, REST APIs, React.js and Python for Zoho Campaigns and Zoho Anti-Spam
- Improved code quality and reduced debugging errors by 25% by streamlining SDLC practices and enhancing code reviews

EDUCATION

Software Engineering Program

Zoho University 04/2016 - 04/2017

- Intensive full-time software engineering training in programming, data structures, OOP, database design, Java/SQL application development, debugging, SDLC, version control and collaborative software delivery

SKILLS

Programming & Backend

Java	Python	Node.js	JavaScript
TypeScript	Spring Boot		
Spring Security	FastAPI	Flask	
REST APIs	Microservices		
Hibernate/JPA			
System Design Documentation			
Mentoring & Team Leadership			

Frontend

React.js	Next.js	Angular
TypeScript	Redux	Material UI
REST API Integration		
Component-Based Architecture		
Role-Based UI Workflows		

AI / Generative AI

LLMs	
Retrieval-Augmented Generation (RAG)	
Prompt Engineering	Semantic Search
Vector Retrieval	Document Intelligence
AI Workflow Orchestration	ML/NLP
AI-Assisted Enterprise Applications	

Databases & Messaging

PostgreSQL	MySQL	MongoDB
Redis	Kafka	SQL
NoSQL		
Data Modeling	Query Optimization	
Indexing	Event-Driven Architecture	

PROJECTS

ERP Document Intelligence & RAG

- Built AI-assisted document analysis workflows using Python, FastAPI, LLMs and RAG, integrating ERP data, document extraction, retrieval context and validation rules to produce traceable enterprise outputs

Finance Workflow Automation

- Designed scalable FastAPI REST APIs, relational data models and workflow state transitions for collections, promise-to-pay, disputes, escalations, recovery and decision-support processes

AI SaaS Platform

- Improved SaaS product efficiency by 30% by building backend services in Java, Spring Boot, and Python on AWS

Enterprise Backend & Microservices

- Designed secure Java/Spring Boot REST APIs, PostgreSQL-backed services, JWT/RBAC security and event-driven workflows for enterprise applications

ML Content Moderation

- Built high-volume spam detection and content moderation workflows using Java, Node.js, Python, Kafka, Redis, MongoDB and PostgreSQL

LANGUAGES

English Advanced ●●●●● Tamil Native ●●●●●

SKILLS

Cloud & DevOps

AWS	Microsoft Azure	GCP
Docker	Terraform	CI/CD
Azure DevOps	Git	CloudWatch

Security & Engineering

JWT	RBAC	Authentication
Authorization	API Security	
Validation	Logging	Error Handling
JUnit	Mockito	SonarQube
Postman	Prometheus	Grafana
